-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 12 and 13 are objected to because of the following informalities:

The term "form" in claim 12, line 4 should be changed to --from--.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Camps et al (US. 5,097,460).

Camps et al discloses a slot-in type reproducing/recording apparatus having an apparatus body (figure 1) having a slot 14 for inserting and ejecting a disk 16; and a hold assembly (figures 2 and 3) provided inside the apparatus body for accommodating the disk including three arms (32, 34, 36, 38) that respectively inherently press an outer circumference edge of the disk at different points with predetermined biasing force as set forth in claim 1 (the outer edge of the disk is inherently pressed by elements 56, 58, 60, 62 of the arms 32, 34, 36, 38 by the force of the spring 50 and the pivot shafts 45 and 47).

Regarding claims 2 and 13, Camps et al discloses a base plate 4 having the hold assembly; a recording/reproducing mechanism (6, 84) for recording on and/or reproducing from the disk; and a loading mechanism for advancing and retracting the base plate between a position where the disk faces the recording/reproducing mechanism and a position near the slot (column 3, lines 29-65). Camps et al also

Art Unit: 2627

inherently discloses an operation switching mechanism for switching advancement and retraction of the base plate and swing operation of the recording/reproducing mechanism (figure 1 inherently shows an eject disk button) as further recited in claim 13.

Regarding claim 12, Camps et al discloses that the recording/reproducing mechanism is attached to the apparatus body in a manner that an end thereof is turnable supported while the other end is swingable toward and away from the disk accommodated in the hold assembly (column 4, lines 1-12).

3. Claims 3-11 and 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen T. Cao whose telephone number is (571) 272-7569. The examiner can normally be reached on Mon - Thurs (7:30 - 6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
